

  
**MONTANA  
ROCKWORKS**  
INC.

# *Leaders in Natural Stone*

*Bill Carter & Brad Mercord*

*Starting Montana Rockworks in 1997, with backgrounds in landscape contracting and Real Estate Development, we were drawn to the rock business with passion. Having used Natural Stone in all of our projects, we aimed to supply the product we loved with others, not only locally but nationwide.*

*"There is something magical about Montana stone. Every time I come home, I get lost in my fireplace. I wander around my landscape and feel inspired and at peace."*

*The dynamic array of colors and textures unique to Northwest Montana are captivating. At Montana Rockworks we want to help you achieve those same feelings.*

*Please take the time to explore our company. We look forward to assisting you with your next project.*

*- Bill Carter & Brad Mercord*

McGregor Lake Ledge with Squares & Recs

McGregor Lake tones consist of cool greys, warm tans and golden browns, accented with unique dendrites.

Chocolate browns and  
tans with grey cores  
distinguish **Castle Rock**  
from other stones.

Castle Rock

Castle Rock Ledge

Dark brown  
and brilliant  
reds with  
blueish grey  
interiors mark  
the color  
pallet of  
**Montana  
Antique.**

Smooth edges and subtle shades make  
**Mussel Shell River** a beautiful  
compliment to your project.

*Kintla Ledge Thin Veneer*

**Kintla** is an exquisite combination of greys, and tans with pops of rust tones throughout creating a unique look and feel.

*Kintla Stacked Stone Thin Veneer*

**Chief Cliff** is a beautiful blend of cool greys, chocolate browns and warm tans. Quarried in Northwest Montana, this stone truly brings the outdoors right into your home.

The rich texture and neutral tones with varying shades of grey make **Moonlight Basin** an excellent foundation for any color pallet.

# *What is Natural Stone Thin Veneer?*

*Montana Rockworks' Thin Veneer is 100% natural. Once quarried, it is cut with specialized saws to a thickness of approximately one inch. This technique allows for the beauty of a natural product to be installed in places not previously possible!*

## *What are the benefits?*

*Natural stone thin veneer is available in many styles, colors, textures and shapes to suit the fashion of your project. Because of the decreased weight of the stone, transportation and installation costs are greatly reduced and no additional support is needed. The longevity, durability and timeless appeal of natural stone make thin veneer the perfect choice for any application that will last a lifetime!*

*Moose Mountain Cottage Thin Veneer*

The **Cottage Series** creates a rustic, organic look by combining a blend of natural linear and mosaic shapes.

Cottage series is also available in McGregor Lake, Castle Rock and Tumbled Chief Cliff

*Make Montana...*

McGregor Lake Retaining Wall

Continue your project outdoors with the beautiful and versatile **Chief Cliff Landscape Stone**. From Steps and walkways to retaining walls and patios, this stone will compliment any landscape design.

*When it comes to masonry, landscape and thin veneer stone; Montana Rockworks is unparalleled in quality and reliability.*

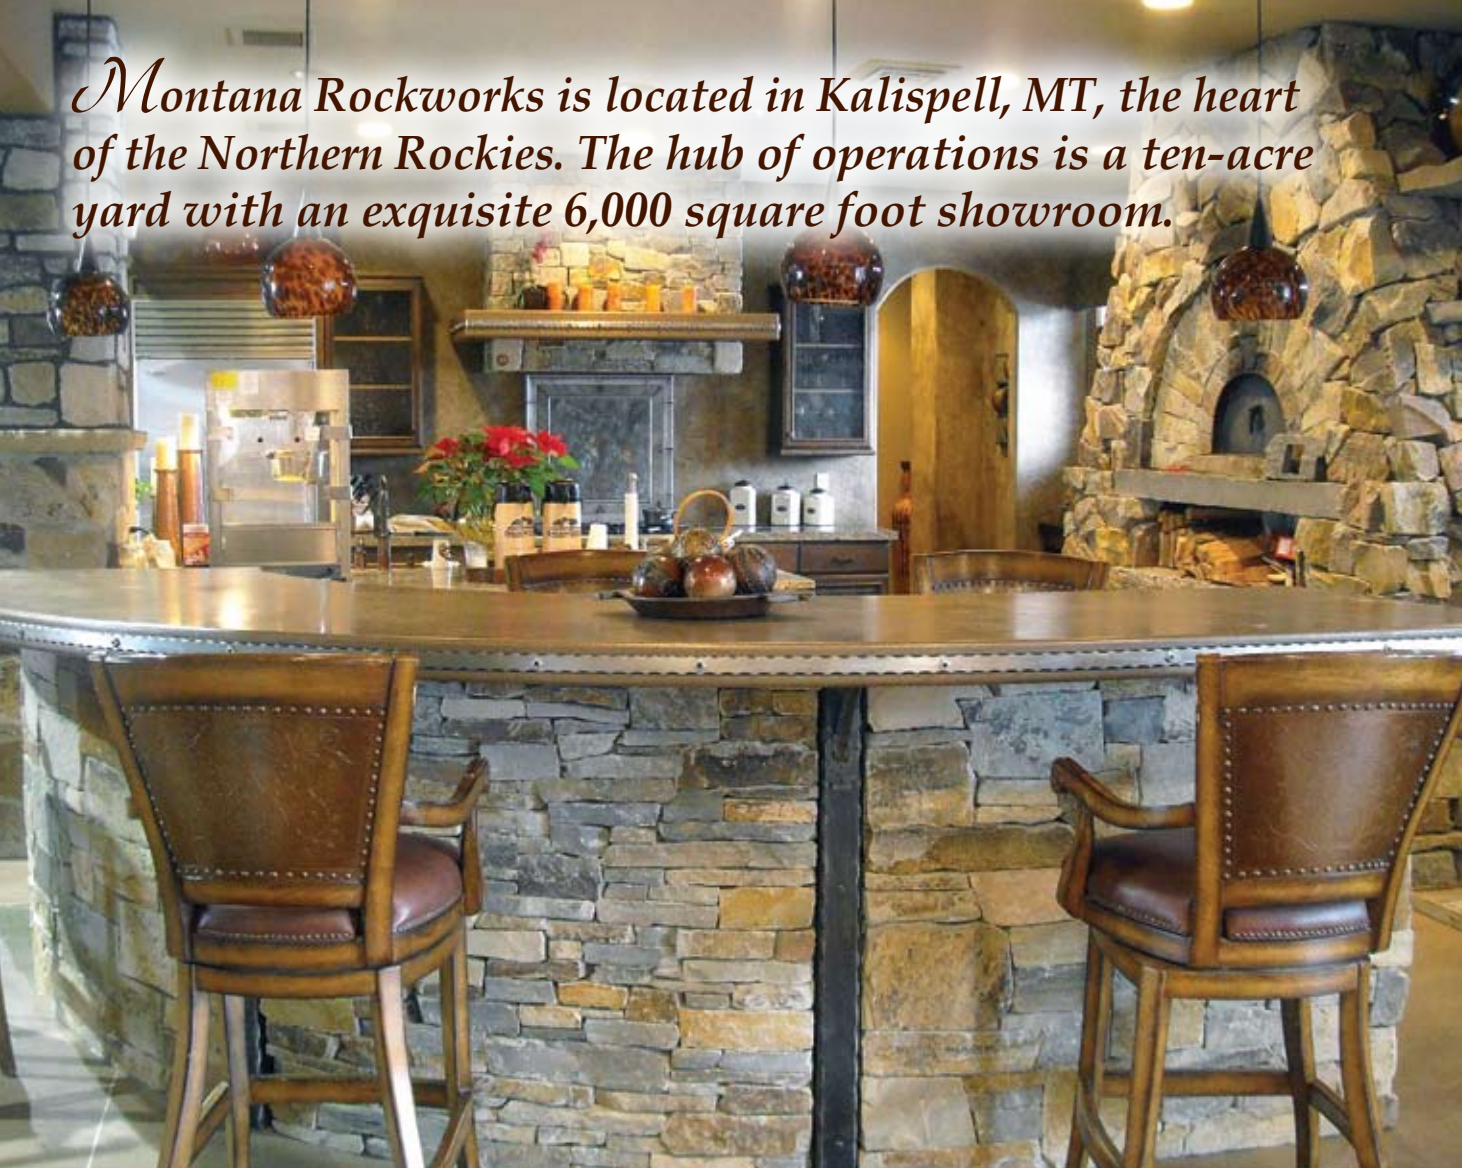

*As a leader in natural stone thin veneer, Montana Rockworks is focused and committed to providing the highest quality stone for your project.*

*Montana Rockworks is located in Kalispell, MT, the heart of the Northern Rockies. The hub of operations is a ten-acre yard with an exquisite 6,000 square foot showroom.*

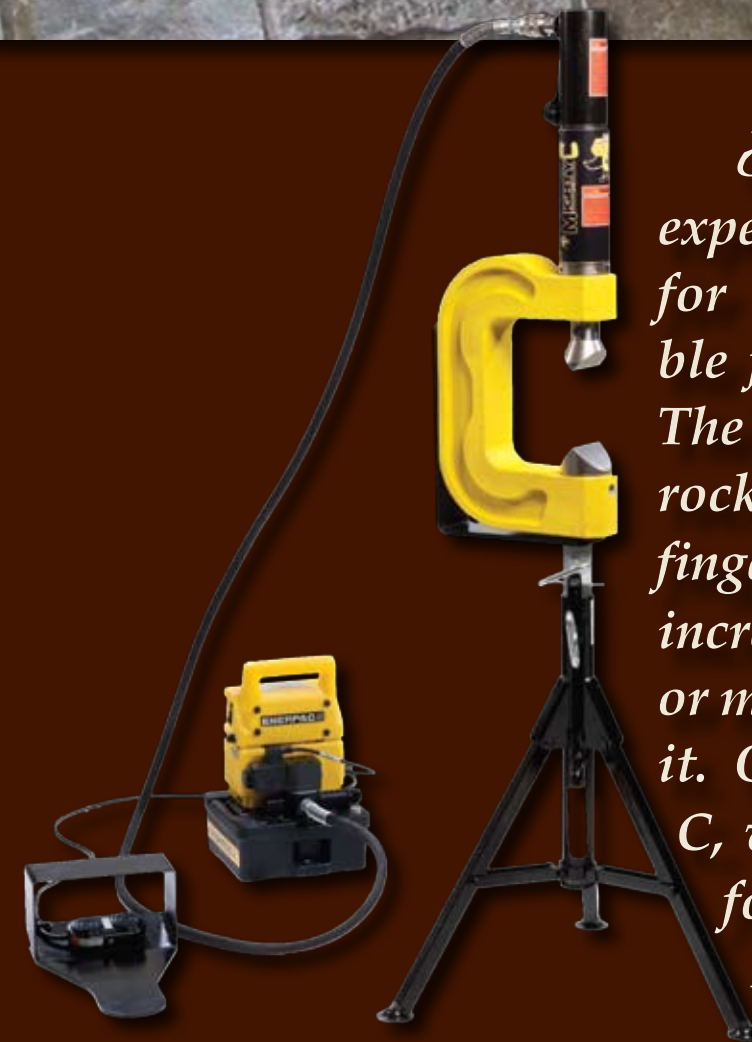

*Designed like a custom home, our showroom showcases the beauty and selection of stone to inspire ideas in applications previously thought not possible.*

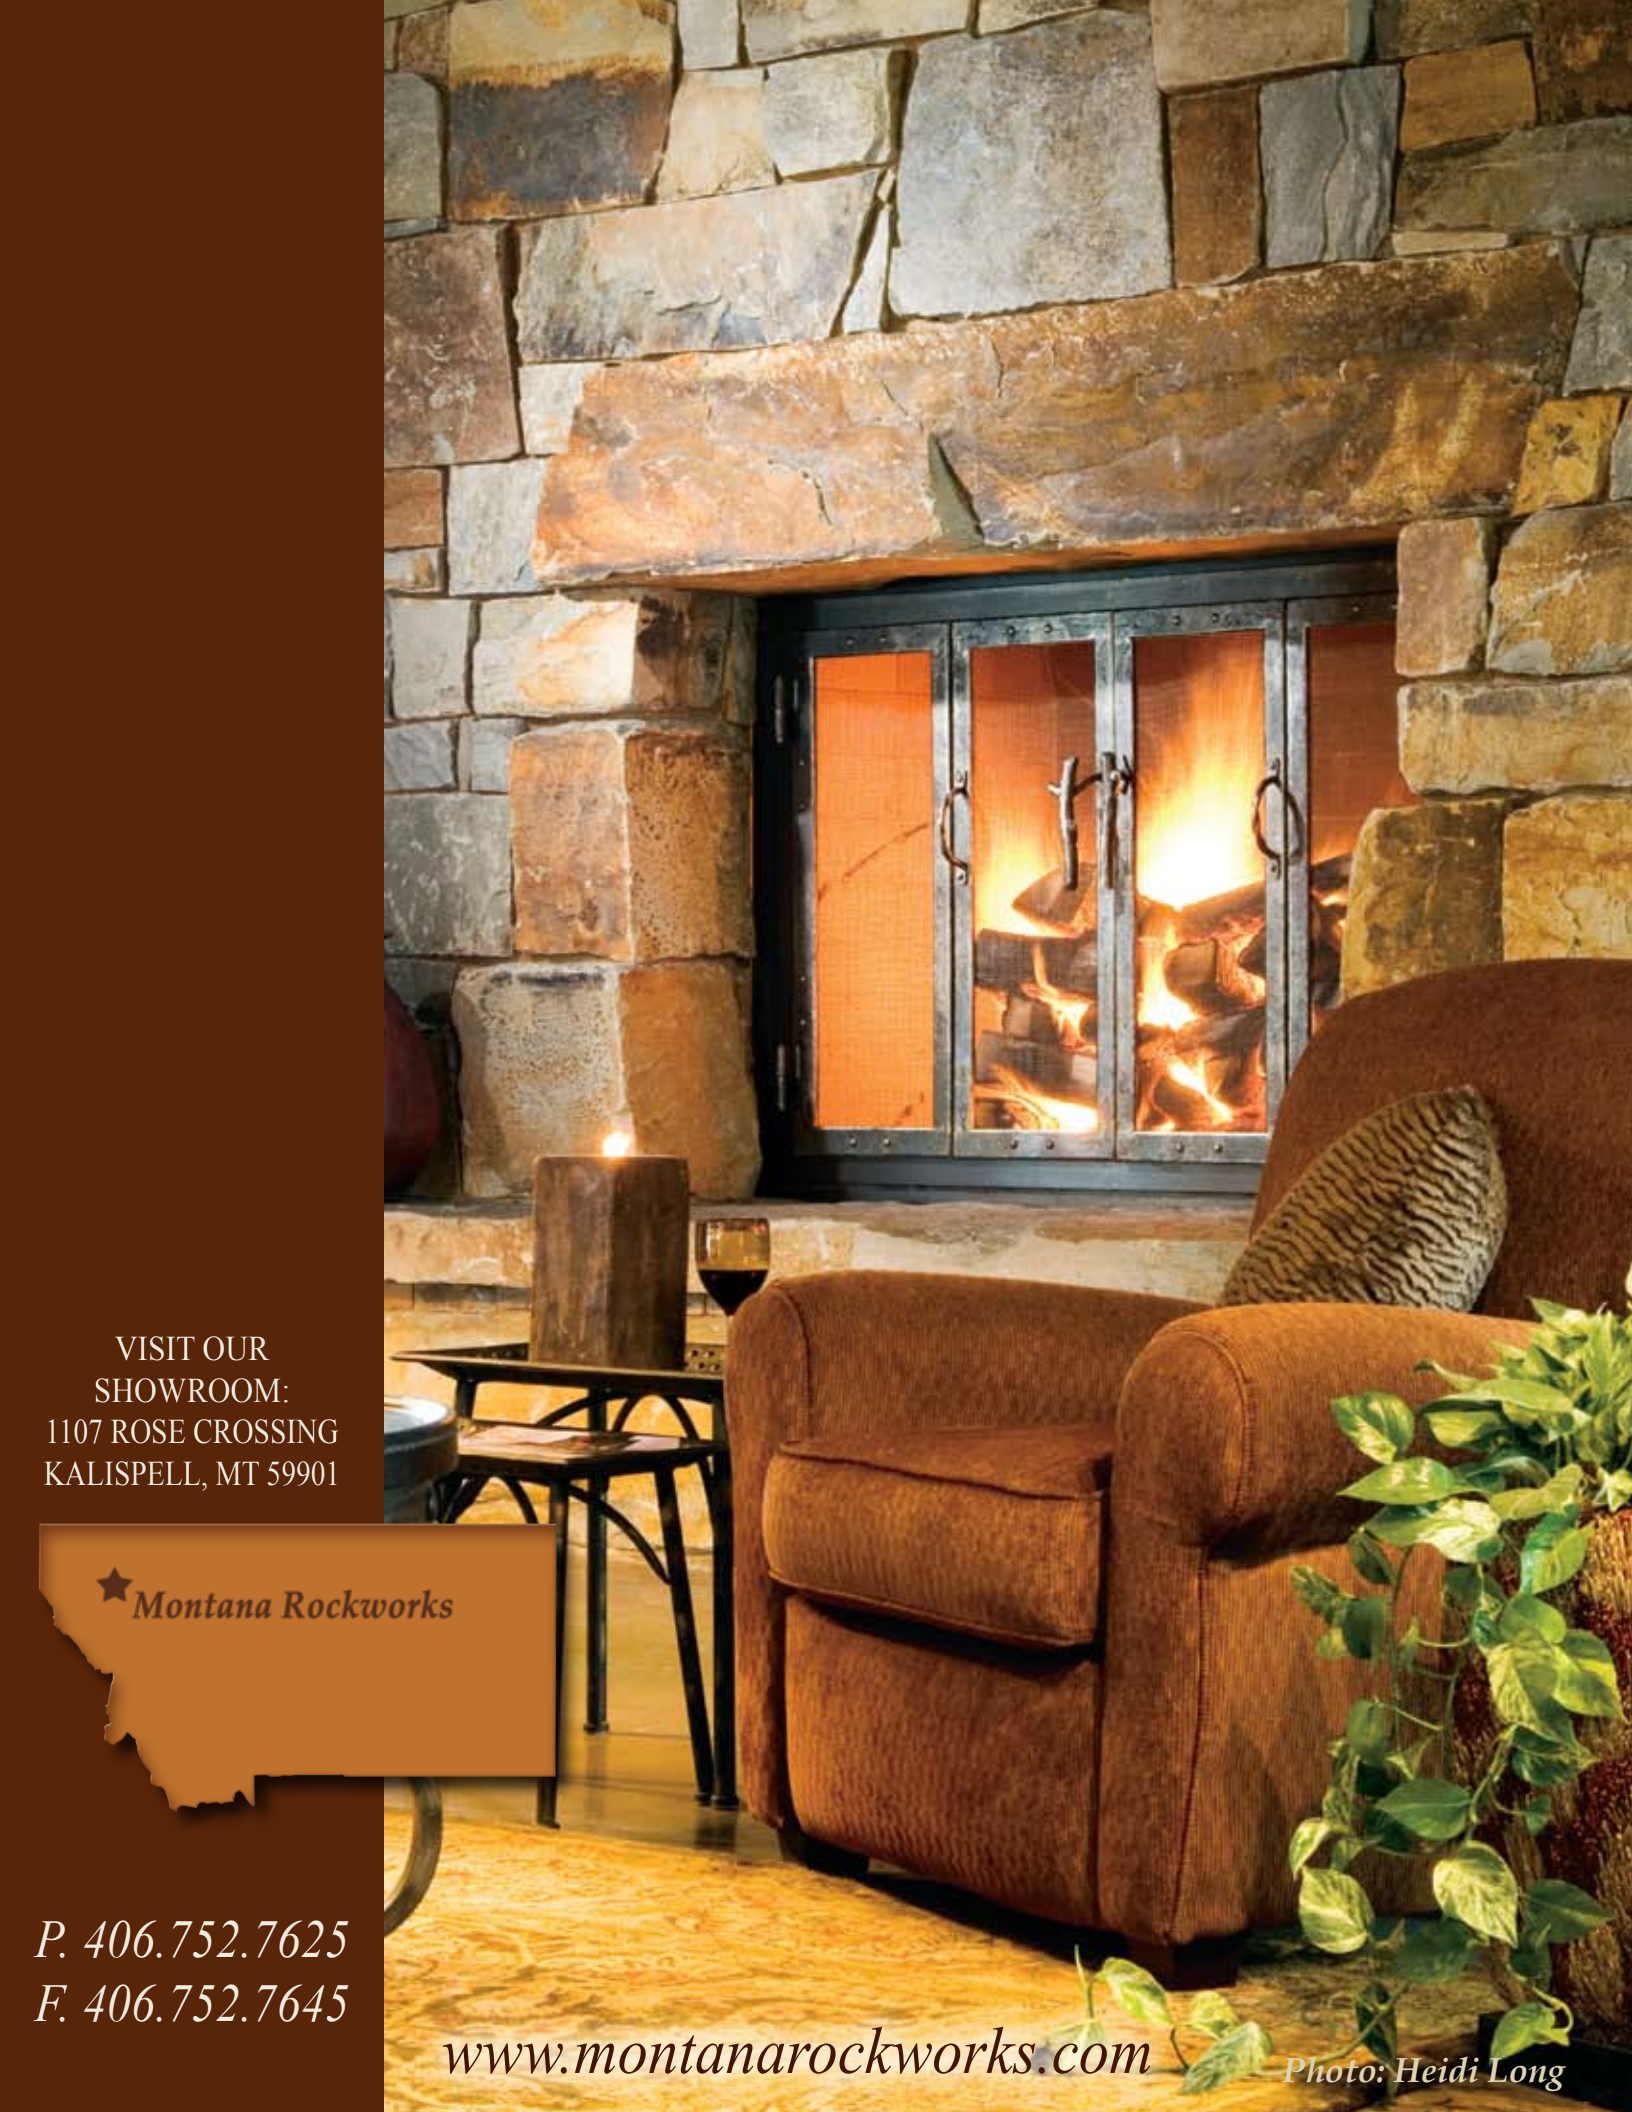

*Montana Rockworks has continually increased efficiencies, developing methods and tools to produce the highest quality stone products available. One such tool is the "Mighty C" thin veneer splitter. Designed, tested and assembled by our owners and staff in Kalispell Montana, this revolutionary Masonry tool allows Montana Rockworks to consistently produce thin veneer of unparalleled quality. Now the worlds most efficient Thin Veneer installation tool is available to contractors worldwide.*

*The "Mighty C" eliminates dust, expensive saw blades and the need for water, while remaining portable for both indoor and outdoor use. The "Mighty C" delivers 15 tons of rock trimming power right at your fingertips. Contractors report increased profitability by as much 50% or more and refuse to do a job without it. Once Contractors try the Mighty C, we find that they purchase a unit for every crew they have operating! Please visit [THEMIGHTYC.COM](http://THEMIGHTYC.COM) for more information.*
